

CLAIM OR CLAIMS

1. A self-mounting automobile window screen for providing a temporary barrier and seal around the opening of a vehicle, comprising:
 - (a) a flexible mesh screen seamed at a bottom position to an anchoring base and at an upper and side positions to a flexible mounting tube; said anchoring base and mounting tube together substantially defining the shape of the vehicle window opening;
 - (b) a lifting means fastened to the upper position of the mounting tube.
2. The self-mounting window screen of claim 1, wherein said mesh screen has small mesh openings suitable to prevent passage of insects and debris.
3. The self-mounting window screen of claim 1, wherein said mounting tube is made of plastic or foam rope material.
4. The self-mounting window screen of claim 1, wherein said anchoring base is made of pliable rubber or suitable heavy but flexible material.
5. The self-mounting window screen of claim 4, wherein the bottom of said anchoring base is in concave shape.
6. The self-mounting window screen of claim 5, wherein a rib is provided in the center of said concave-shaped bottom of said anchoring base.
7. The self-mounting window screen of claim 1, wherein said lifting means is a lift tab made of resilient rubber materials.
8. The self-mounting window screen of claim 7, wherein said lift tab is sufficiently large enough for easy grasping by the user.
